OEBC Candidate Instruction and Exam Guide, OSCE Equipment

Contents

1. OSCE Optometry Equipment	3
Appendix A:	3
Appendix B:	4

1. OSCE Optometry Equipment

Technical skills stations involve both a patient and a model. You will be interacting with a patient throughout the station and may be required to demonstrate some aspect of a technical skill on the patient while other aspects of the technical skill are to be demonstrated on the model provided. You may be asked to explain your findings to a colleague not a patient. Therefore, you do not need to go to the level of a patient's understanding.

The patients you'll be performing the various techniques on have been selected to give you a typical encounter. However, the model heads have heavy eye lids to increase the challenge in manipulating them. As you may encounter patients with difficult eye lids during your career.

(Refer also to the OSCE Administration Video at www.oebc.ca)

Appendix A:

All candidates use the same equipment for standardization. A list of the optometry equipment that is used, is listed in the table below.

Equipment	Make and Model	Reference Information
Tonometer	Perkins MK3	PERKINS TONOMETER Instructions For Use (IFU) Quick Guide Perkins Mk3
BIO Headset	Heine OMEGA 600	https://www.heine.com/en/products/omega-600
Lens	BIO	Plano
Slit Lamp	Z800	
Slit Lamp Base		
Lens Kit		
Gonio Lens	3 mirror	No Flange
RET	Heine Beta 200 NT3.5V	
Micro Rec attachment		https://customsurgical.co/microrec/

Appendix B:

These slides show what to expect if there is a patient in the station or a model ONLY.

Retinoscopy

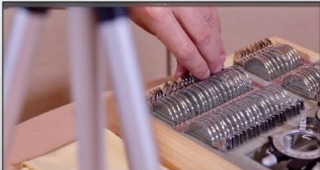

Retinoscope / Rétinoscope

On/off switch and brightness control
Interrupteur marche/arrêt et réglage de la luminosité

Set up of the Model Eye for Retinoscopy

Close up of supplied trial lens case

OPTOMETRY EXAMINING BOARD OF CANADA / BUREAU DES EXAMINATEURS EN OPTOMÉTRIE DU CANADA

Binocular Indirect Ophthalmoscope (BIO)

Candidates will be viewed through a teaching mirror while performing BIO on a patient

OEBC's proprietary BIO

BIO joystick

OPTOMETRY EXAMINING BOARD OF CANADA / BUREAU DES EXAMINATEURS EN OPTOMÉTRIE DU CANADA

Gonioscopy

A cell phone and viewing technology is used in this station. Candidates will be observed while performing gonioscopy on a patient.

Tonometry

Perkins MKIII Tonometer

https://www.haag-streit.com/fileadmin/Haag-Streit_UK/Downloads/CCO_downloads/Perkins_downloads/Perkins_quick_guide.pdf

Candidates use Goldman regularly during their training. However, circumstances will arise where you can't use a Goldman (i.e., the patient has scoliosis, you're examining a patient in the hospital or a senior home, etc.) So, we challenge you by using a Perkins on the OSCE. This station will require you to explain why measuring pressure is important and recommending action based on a specific pressure.

Tonometry in action
